

ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

Date/Time: May 8, 2003/ 4 50 p m

Site Contact(s): Robert E Fiehweg, RISS EC
Phone: xt 7403

Regulatory Contact: James Hindman, CDPHE
Phone: 303-692-3345

Agency: CDPHE

Purpose of Contact: Request 30-day Extension on LLM Waste Stored in B223

Discussion

The project to remove sludge from Tank 231A has generated 18 Standard Waste Boxes and 20 IP-2 half crates of LLM waste. The containers are currently stored in B223A which is both Unit 43 01, a 30-day staging area, and Unit 8120, a 90-day area. The 30-day staging area was established for the 231A sludge. Today, I contacted James to report that the sludge removal portion of the project is now complete, and told him that we have a total of 38 containers of waste. I also reported that the waste has been characterized and based on the approved profile that we expect to dispose of the waste at Envirocare. I also reported that some of the containers filled early on in the project have reached the end of a 30-day extension he granted in mid-March as reported by David Ward. I asked for an additional 30-days extension from today, and James agreed. He asked if we would be able to remove the waste from B223A within that 30 days, and I told him that we could and that we would do so.
